Other Locations: All across US

USDA's National Agricultural Statistics Service (NASS) conduct hundreds of surveys and prepare reports covering virtually every facet U.S. agriculture — production and supplies of food and fiber, prices paid and received by farmers, farm labor and wages, farm aspects of the industry. In addition, NASS's 45 State Statistical Offices (SSO's) publish data about many of the same topics for local audiences. NASS publications cover a wide range of subjects, from traditional crops, such as corn and wheat, to specialties, such as mushrooms and flowers; from calves born to hogs slaughtered; from agricultural prices to land in farms. The abundance of information produced has earned four NASS employees the title, "The Fact Finders of Agriculture."
